

# A glance at 8 and 16 GeV

**Lene Kristian Bryngemark**

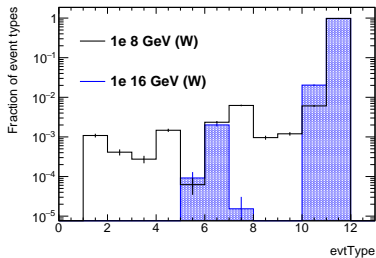

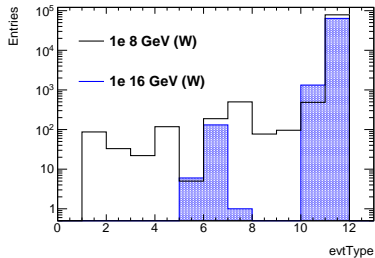

Lund University

LULDMX meeting, March 26, 2019

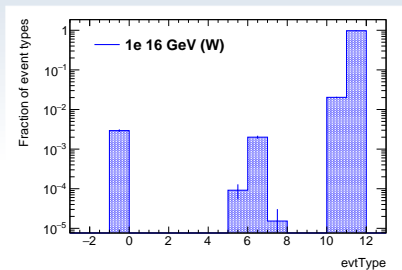

# Caveats

- no strangeness fix
- small samples
- all W target
- all with cut on particle kinetic energy at 200 MeV (higher cuts: order 1 differences)

# Event type in 8 and 16 GeV

# Including underflow in 16 GeV

8 GeV looks very similar
