

# ***Differentiable analysis***

*A lightning overview*

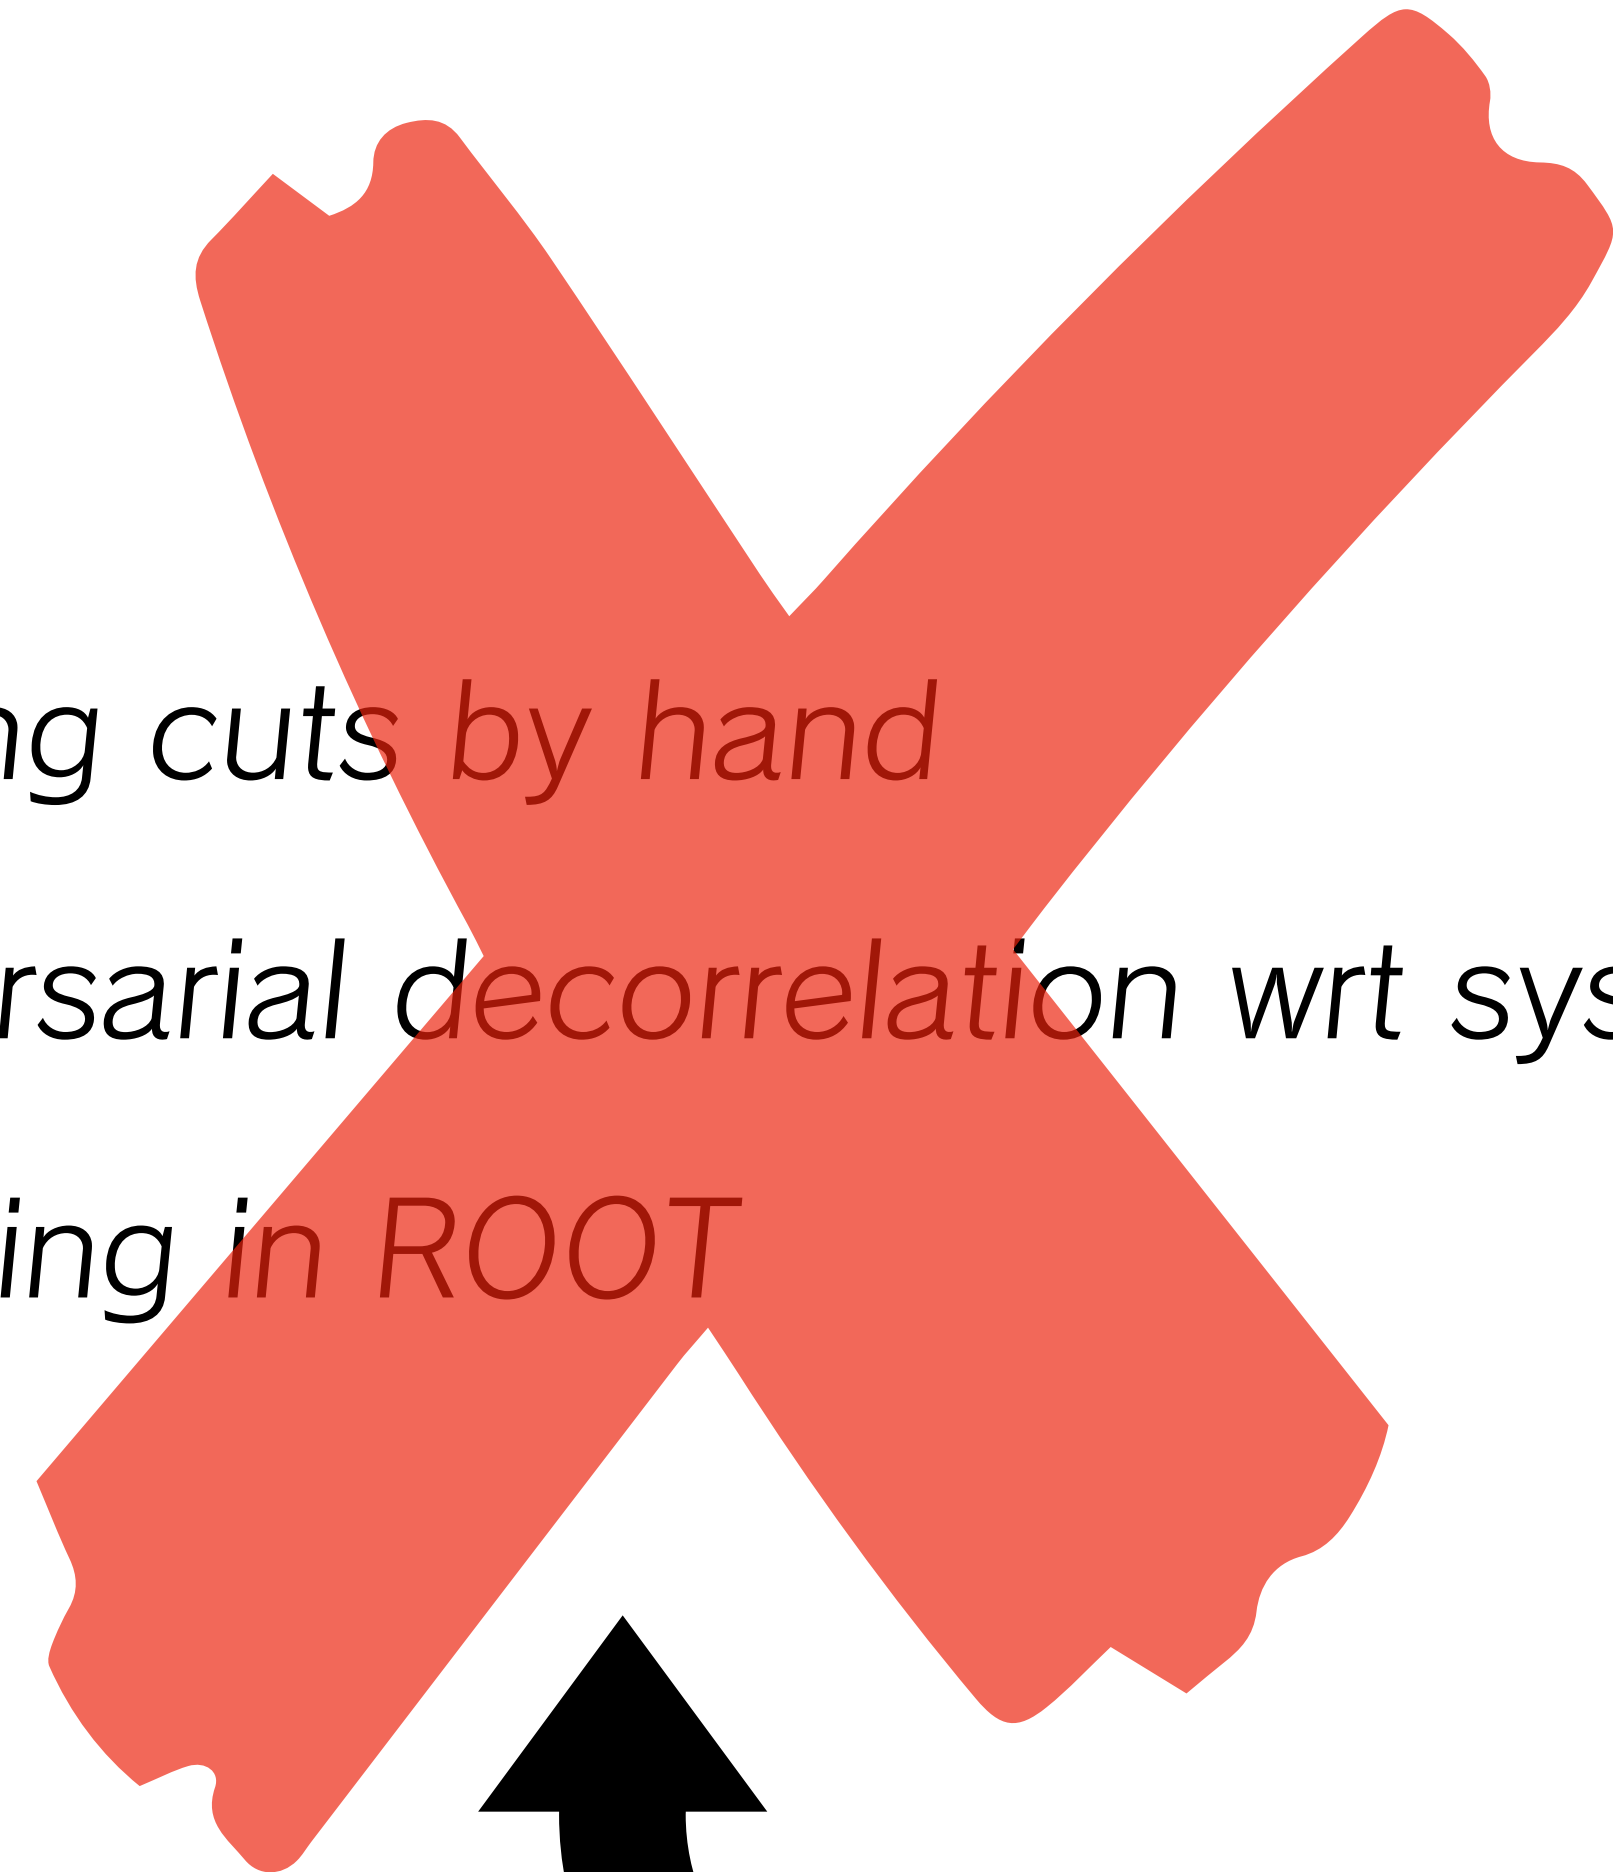

**Nathan Simpson, Doktoranddagen, 2020-05-28**

***I am lazy.***

Tuning cuts *by hand*

Adversarial *decorrelation* wrt systematics

Working *in ROOT*

*I don't want to  
do these things*

<https://www.cs.umd.edu/~tomg/projects/landscapes/>

What does that word mean?

Optimal analysis

<https://knowyourmeme.com/memes/when-you-see-a-repost-tom-hd>

<https://www.cs.umd.edu/~tomg/projects/landscapes/>

[...]  
[.....]  
[.....]

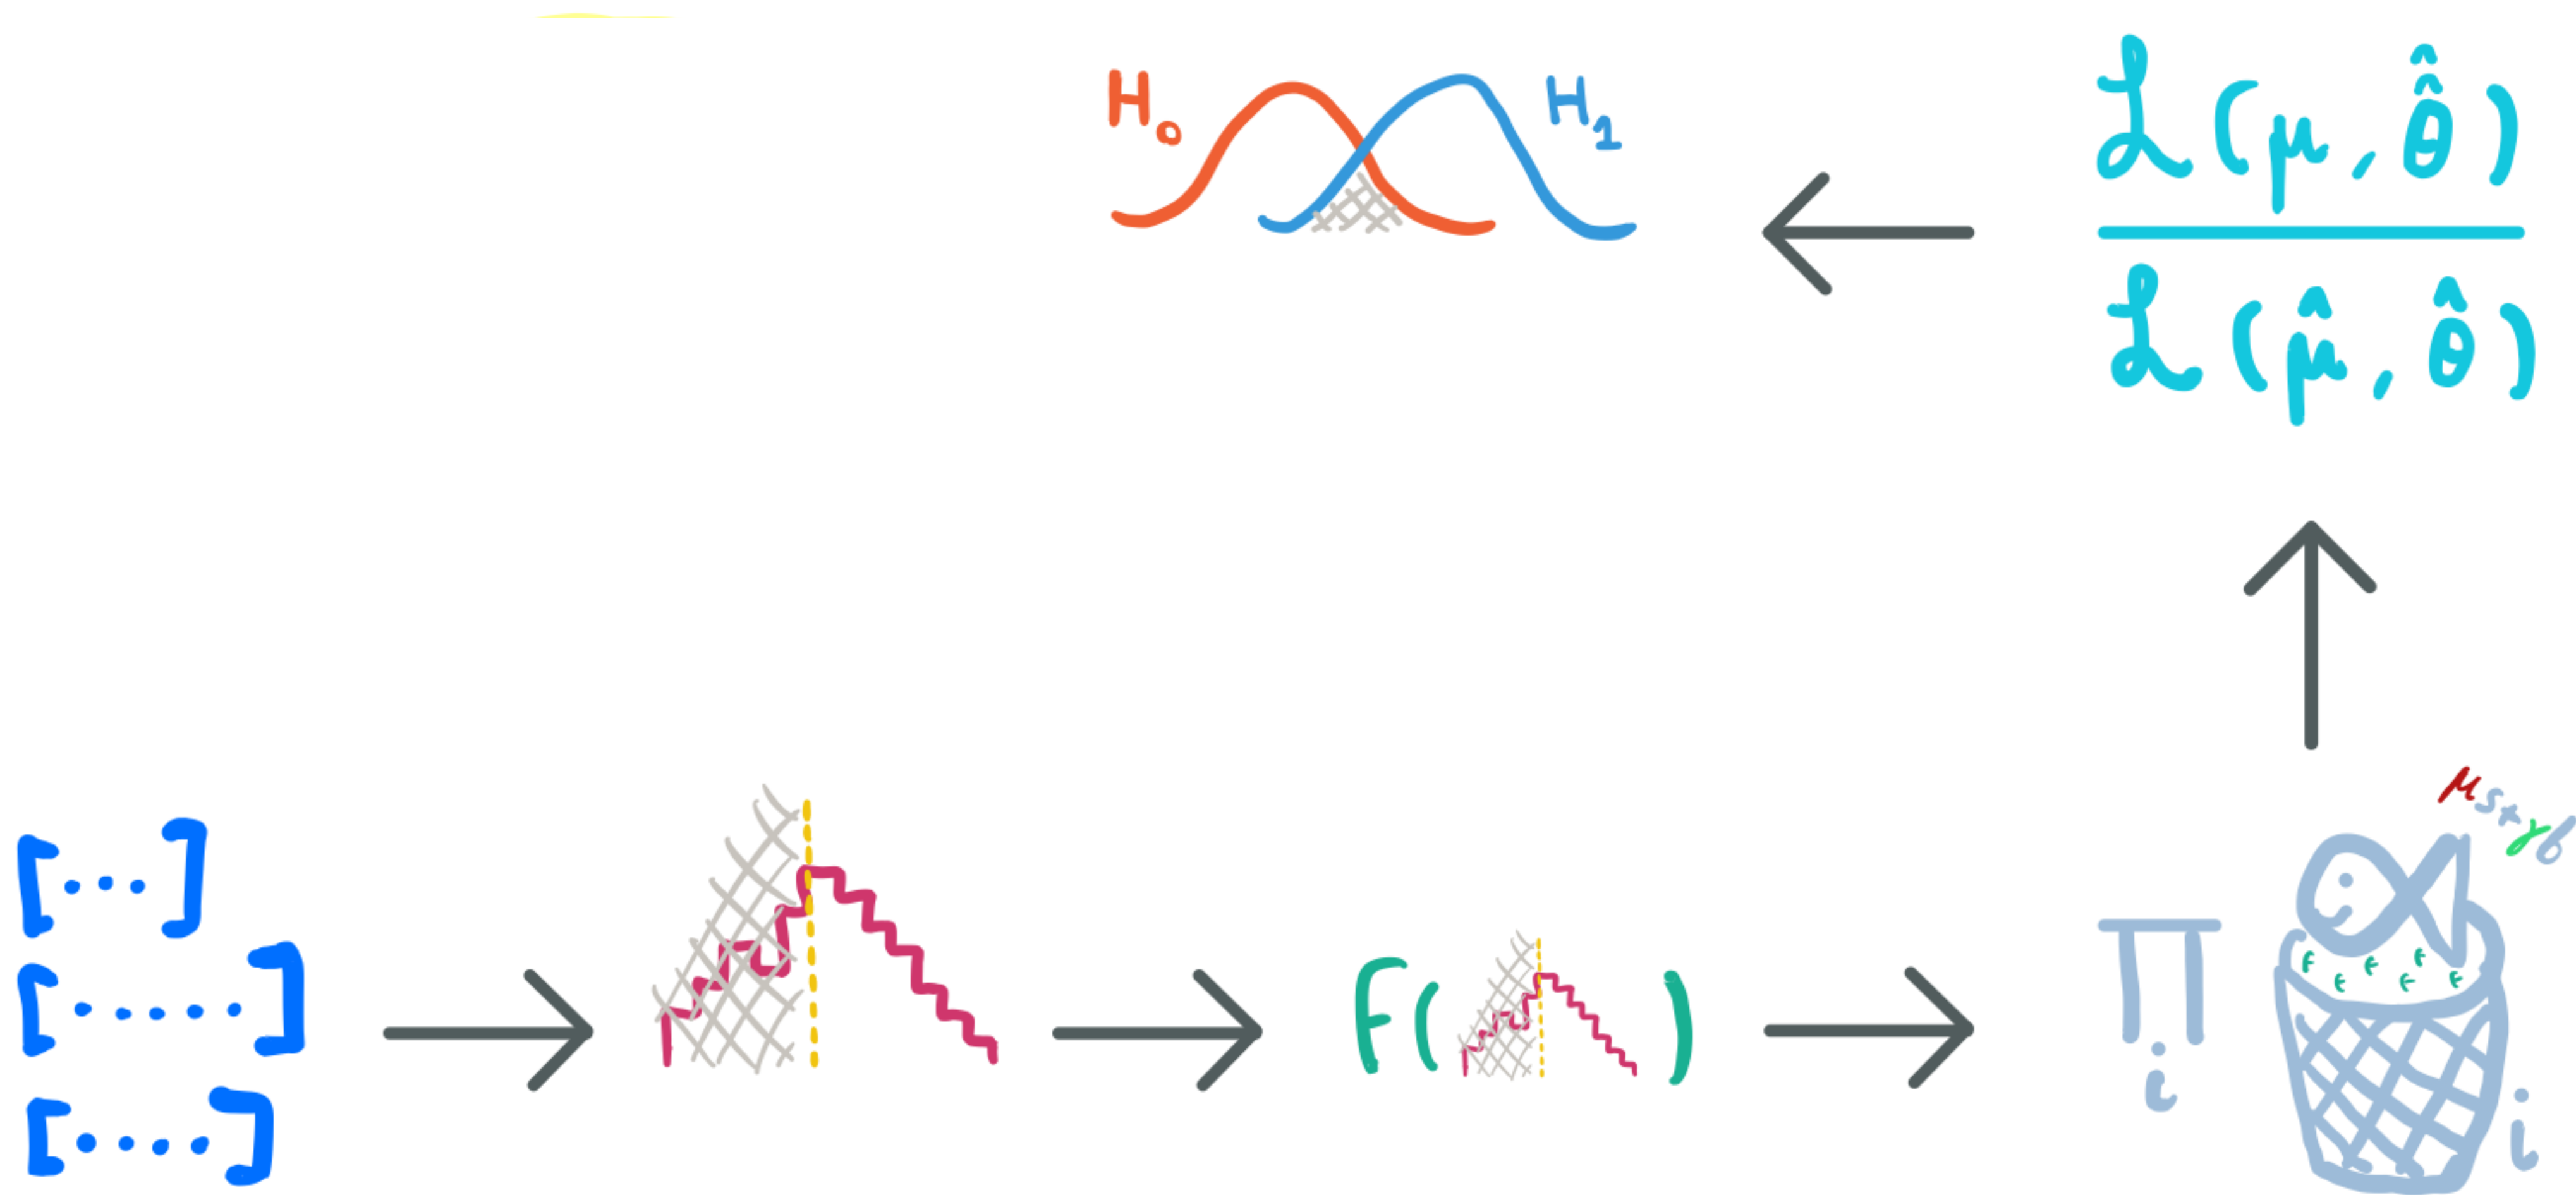

[...]

$F(\text{graph})$

$$\frac{\mathcal{L}(\mu, \hat{\theta})}{\mathcal{L}(\hat{\mu}, \hat{\theta})}$$

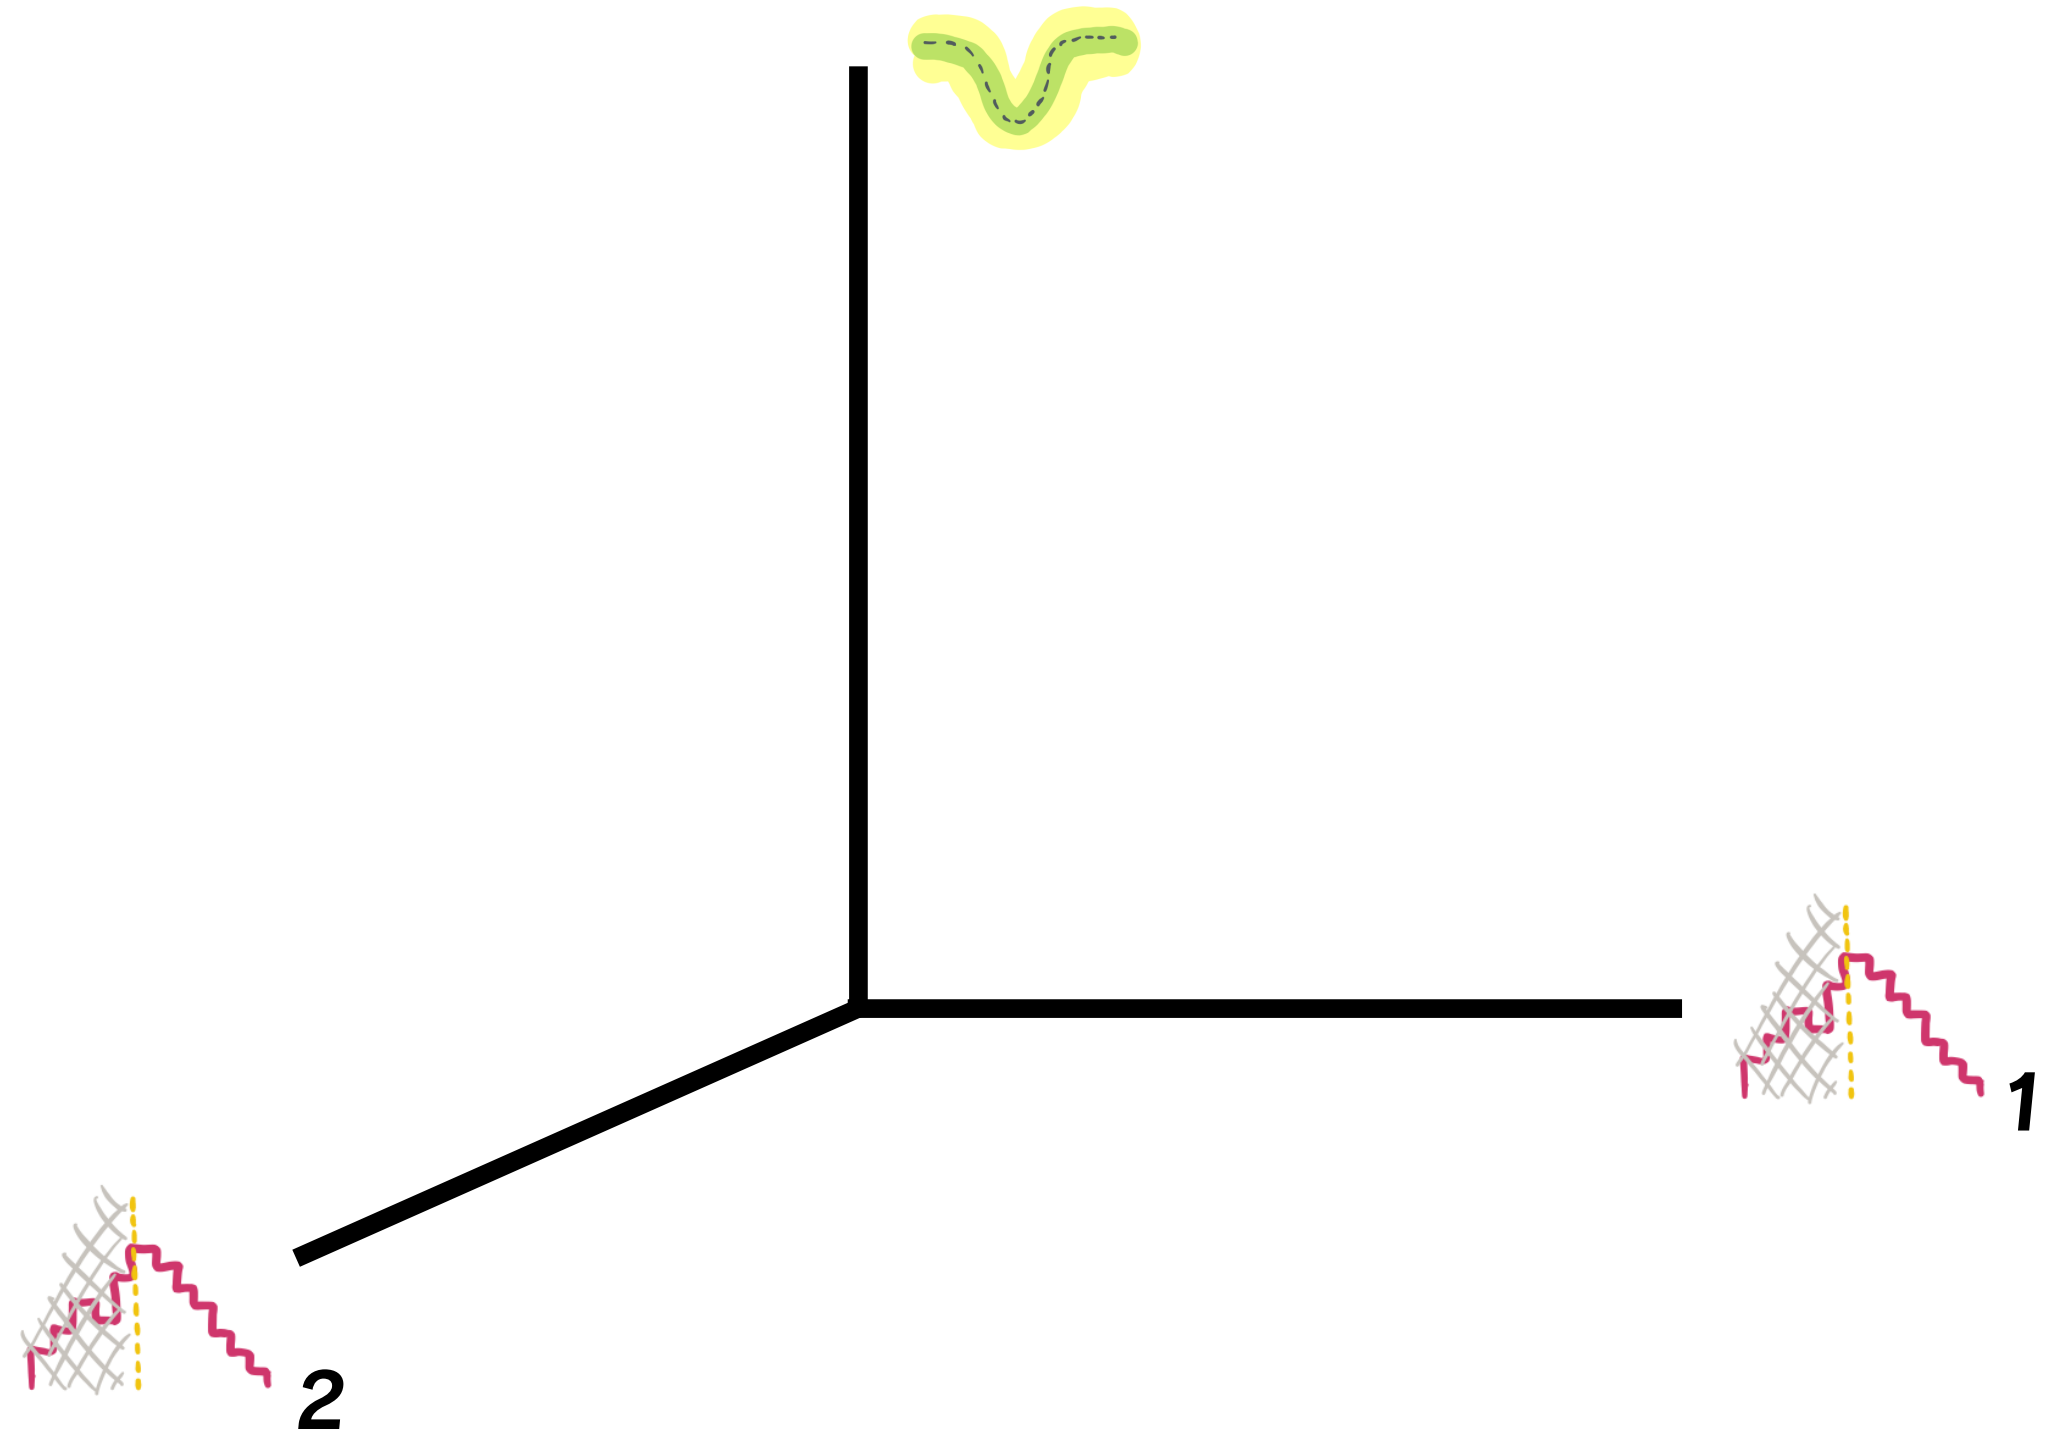

$$\frac{\mathcal{L}(\mu, \hat{\theta})}{\mathcal{L}(\hat{\mu}, \hat{\theta})}$$

[...]  
[...]  
[...]

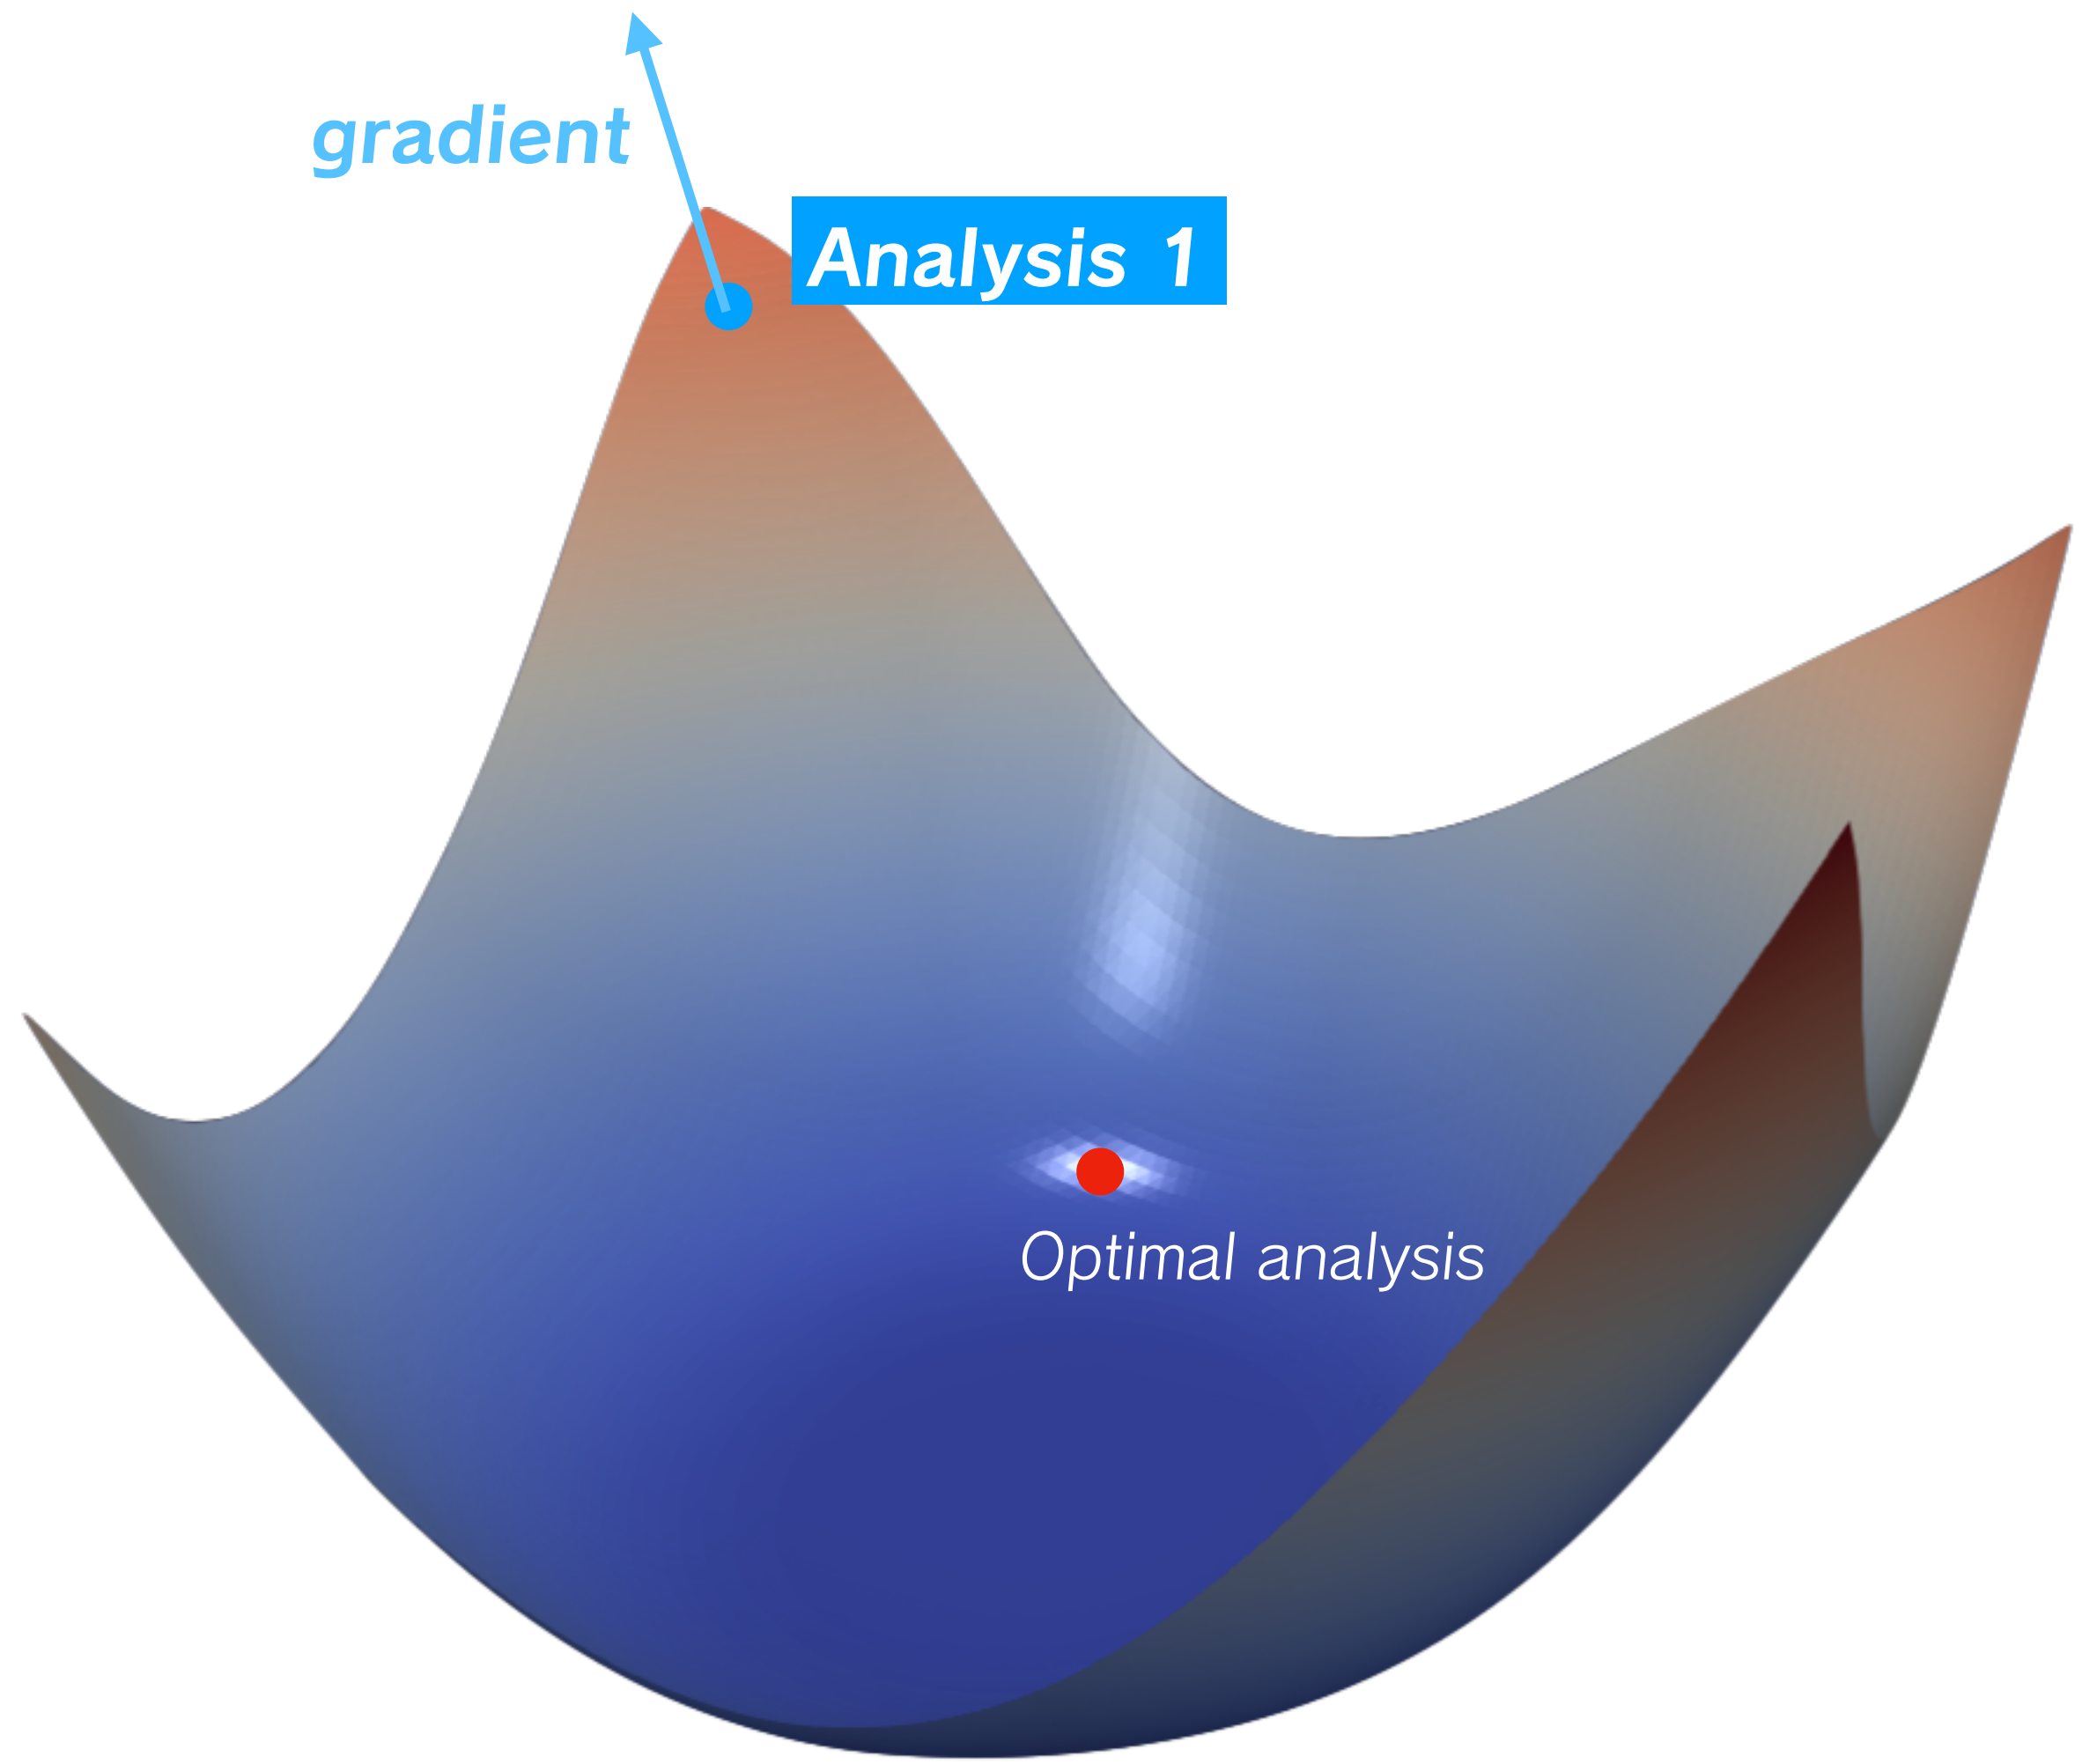

$f(\text{graph})$

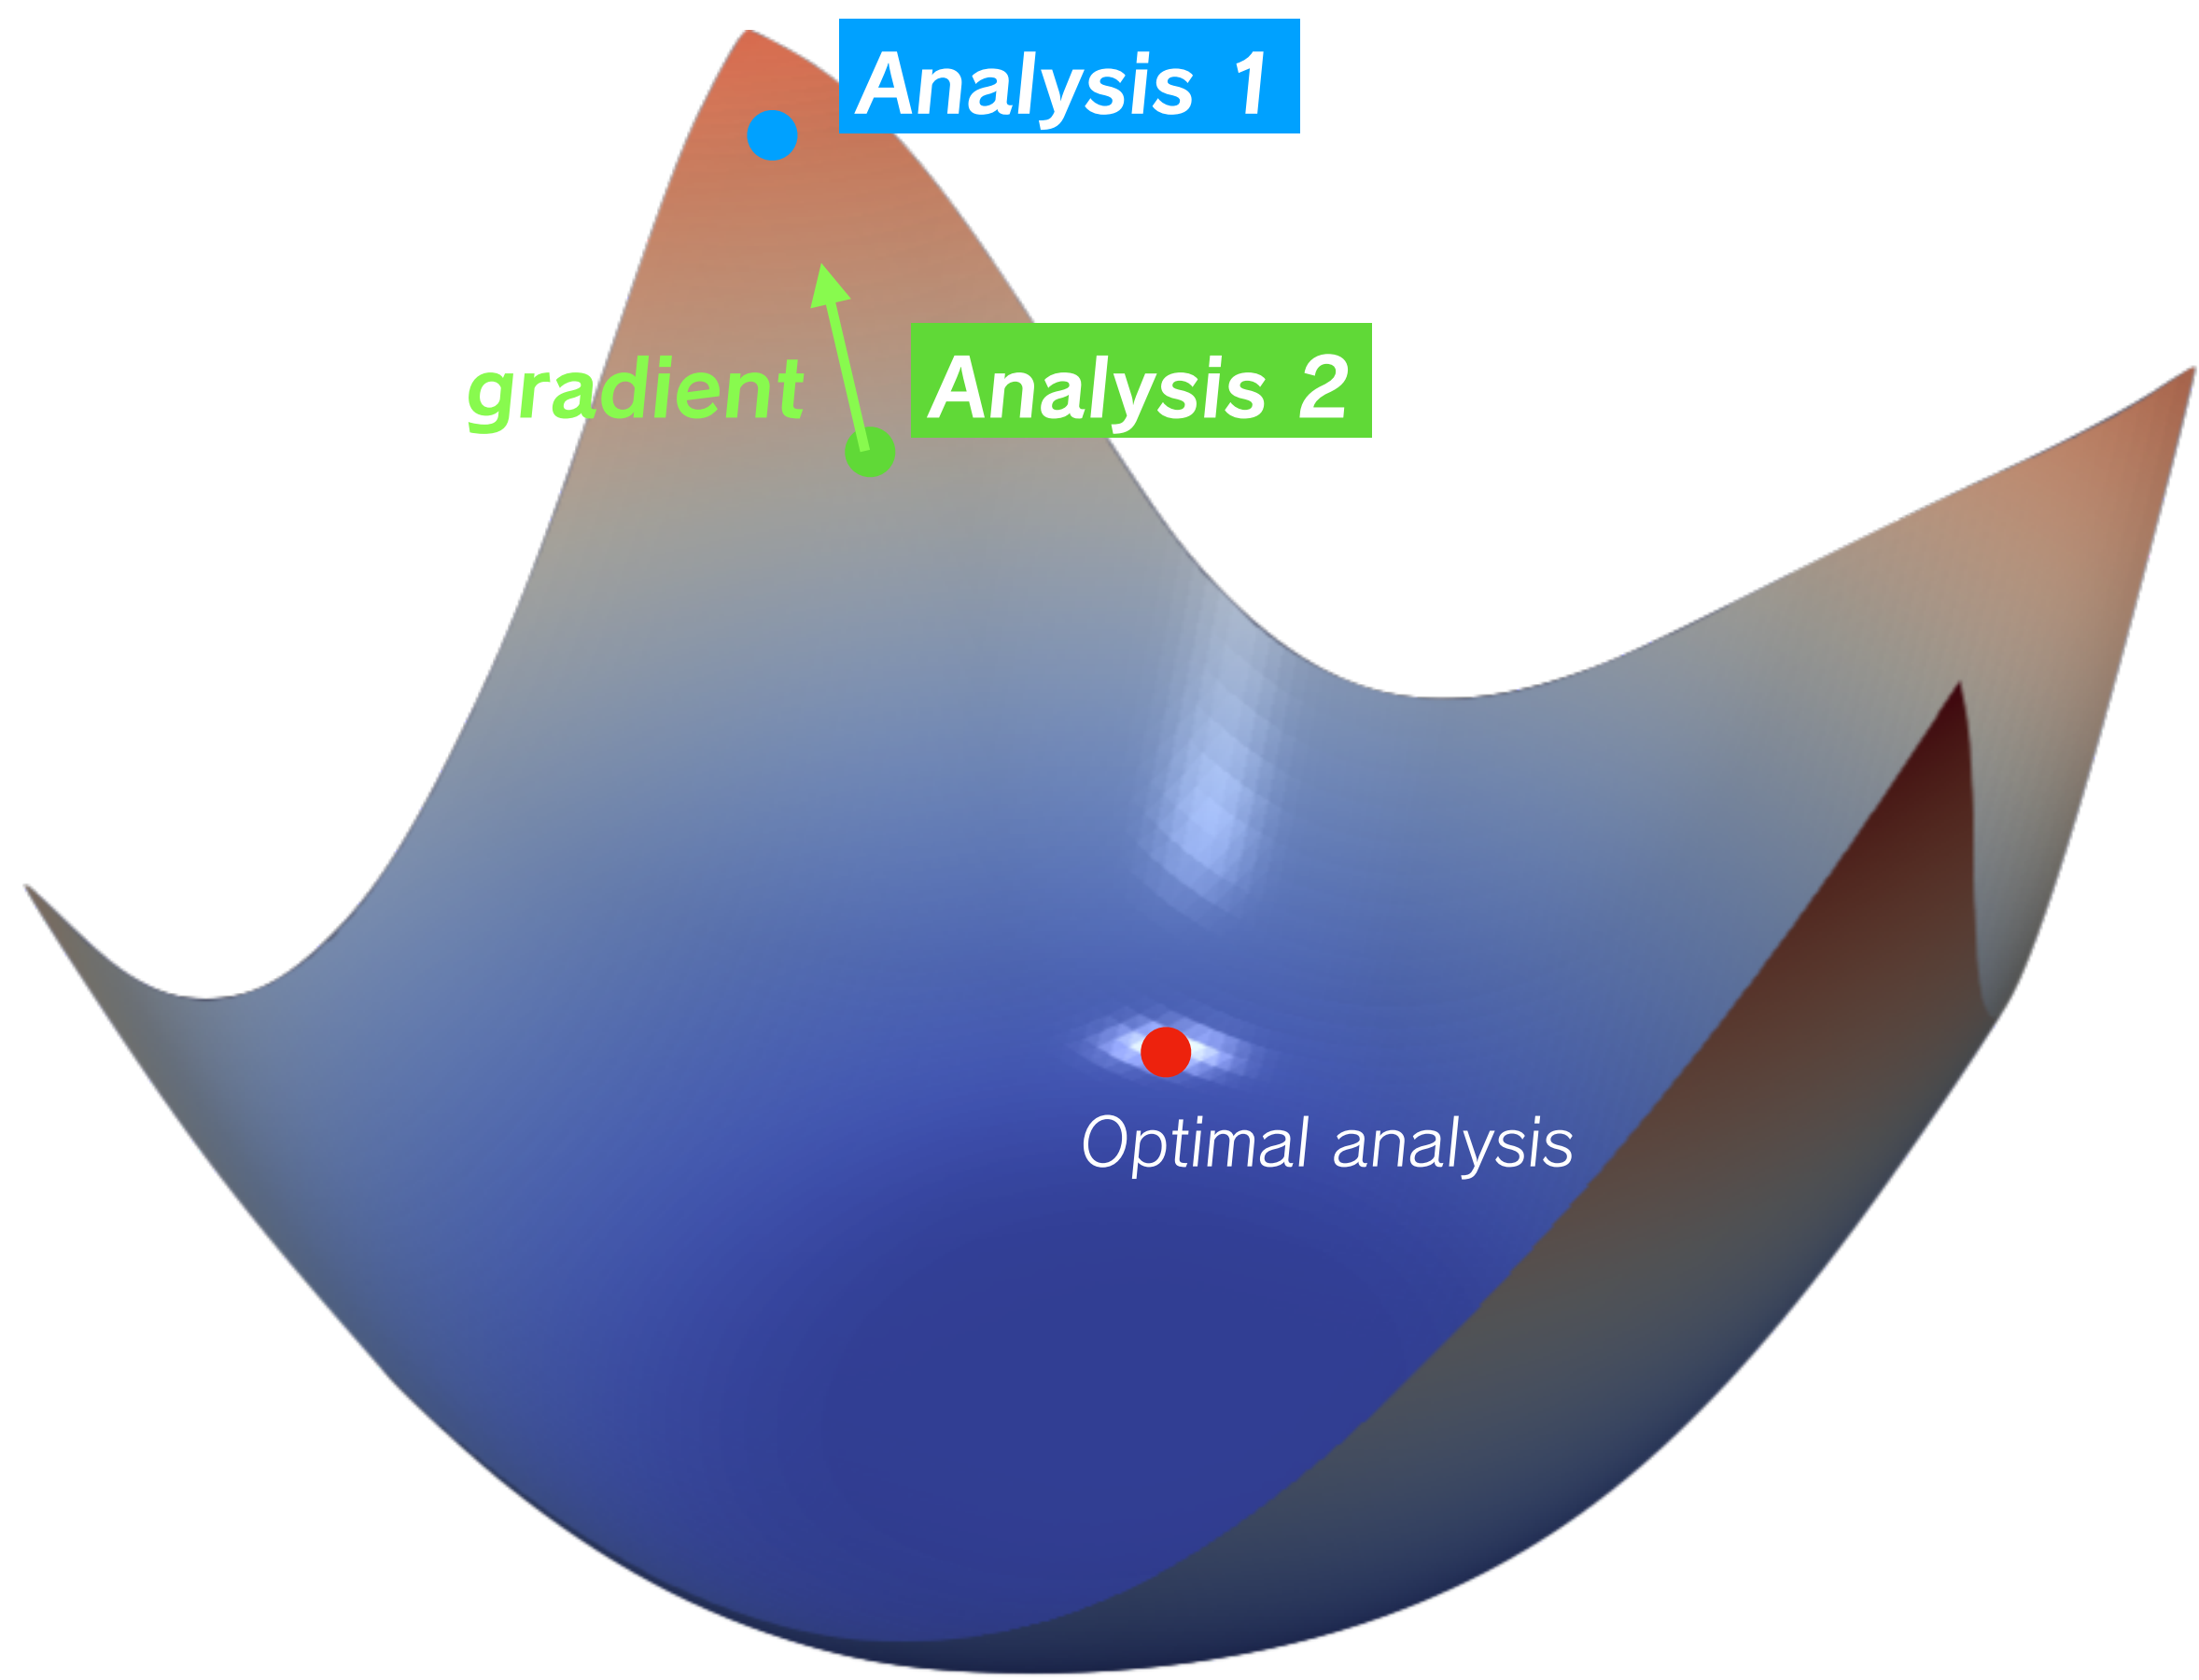

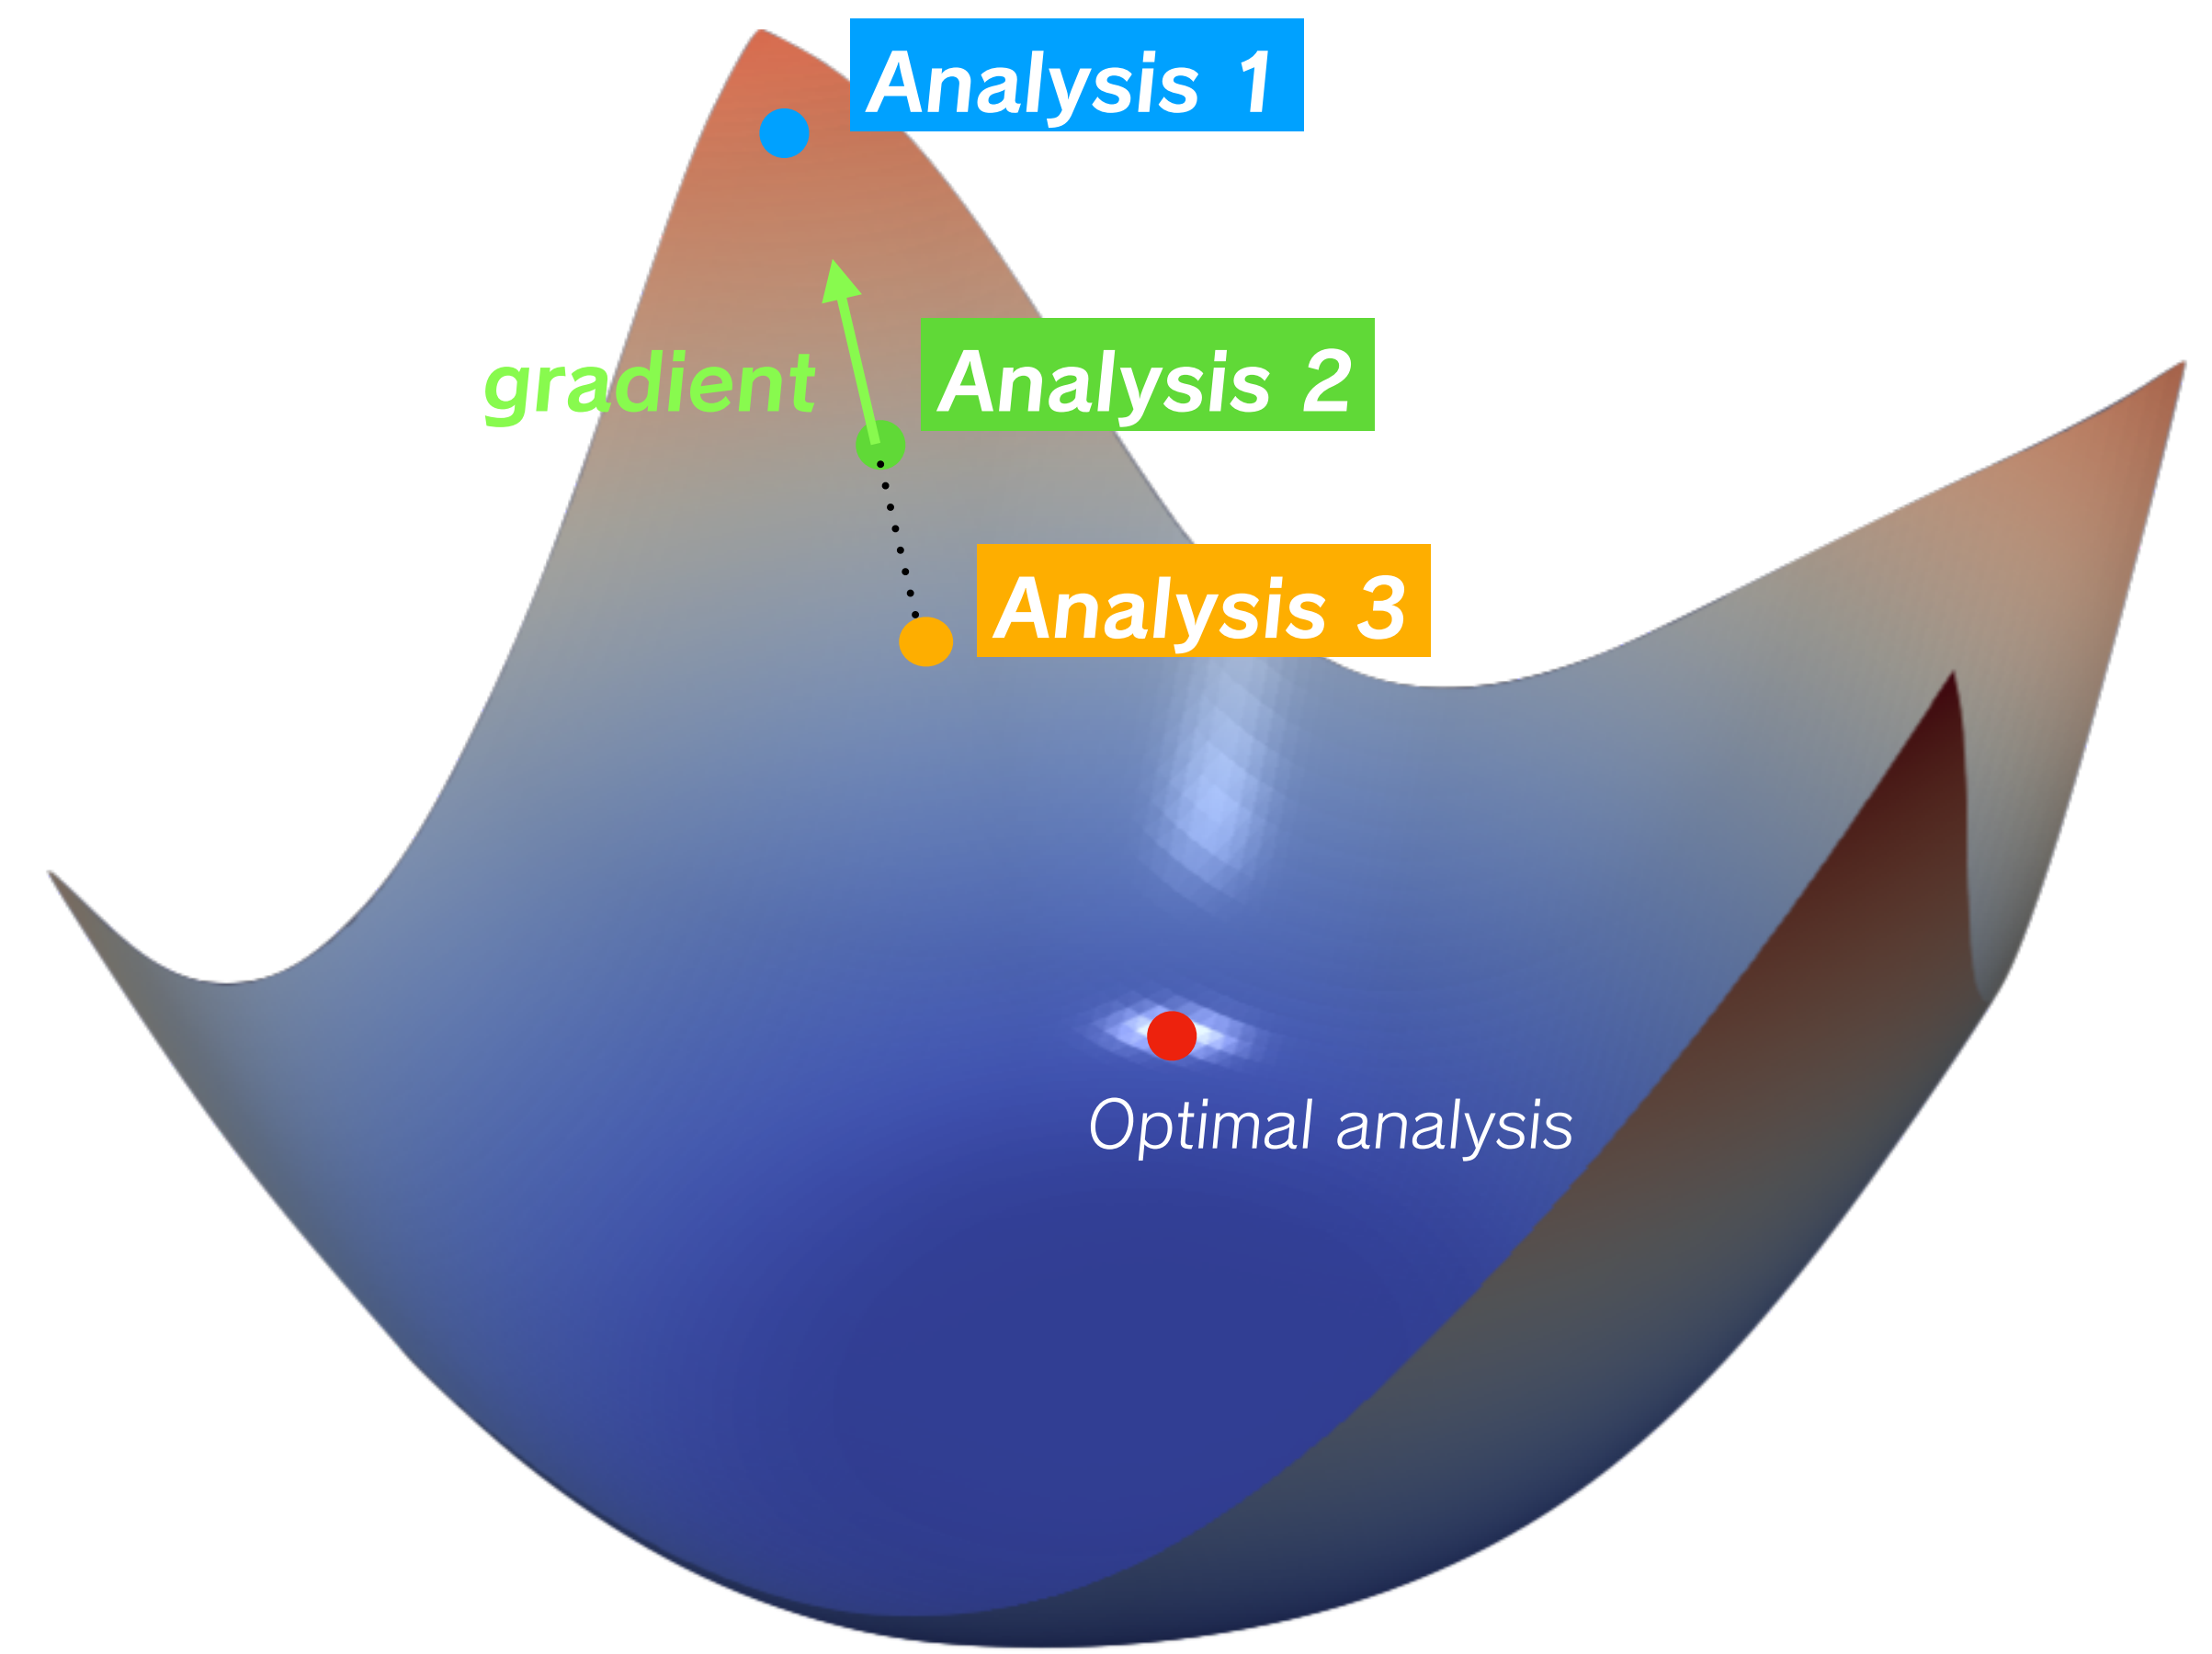

**etc...**

$$\frac{\mathcal{L}(\mu, \hat{\theta})}{\mathcal{L}(\hat{\mu}, \hat{\theta})}$$

$$\frac{\partial}{\partial} \frac{\text{worm}}{\partial \text{hatched area}}$$

[...]  
[...]  
[...]

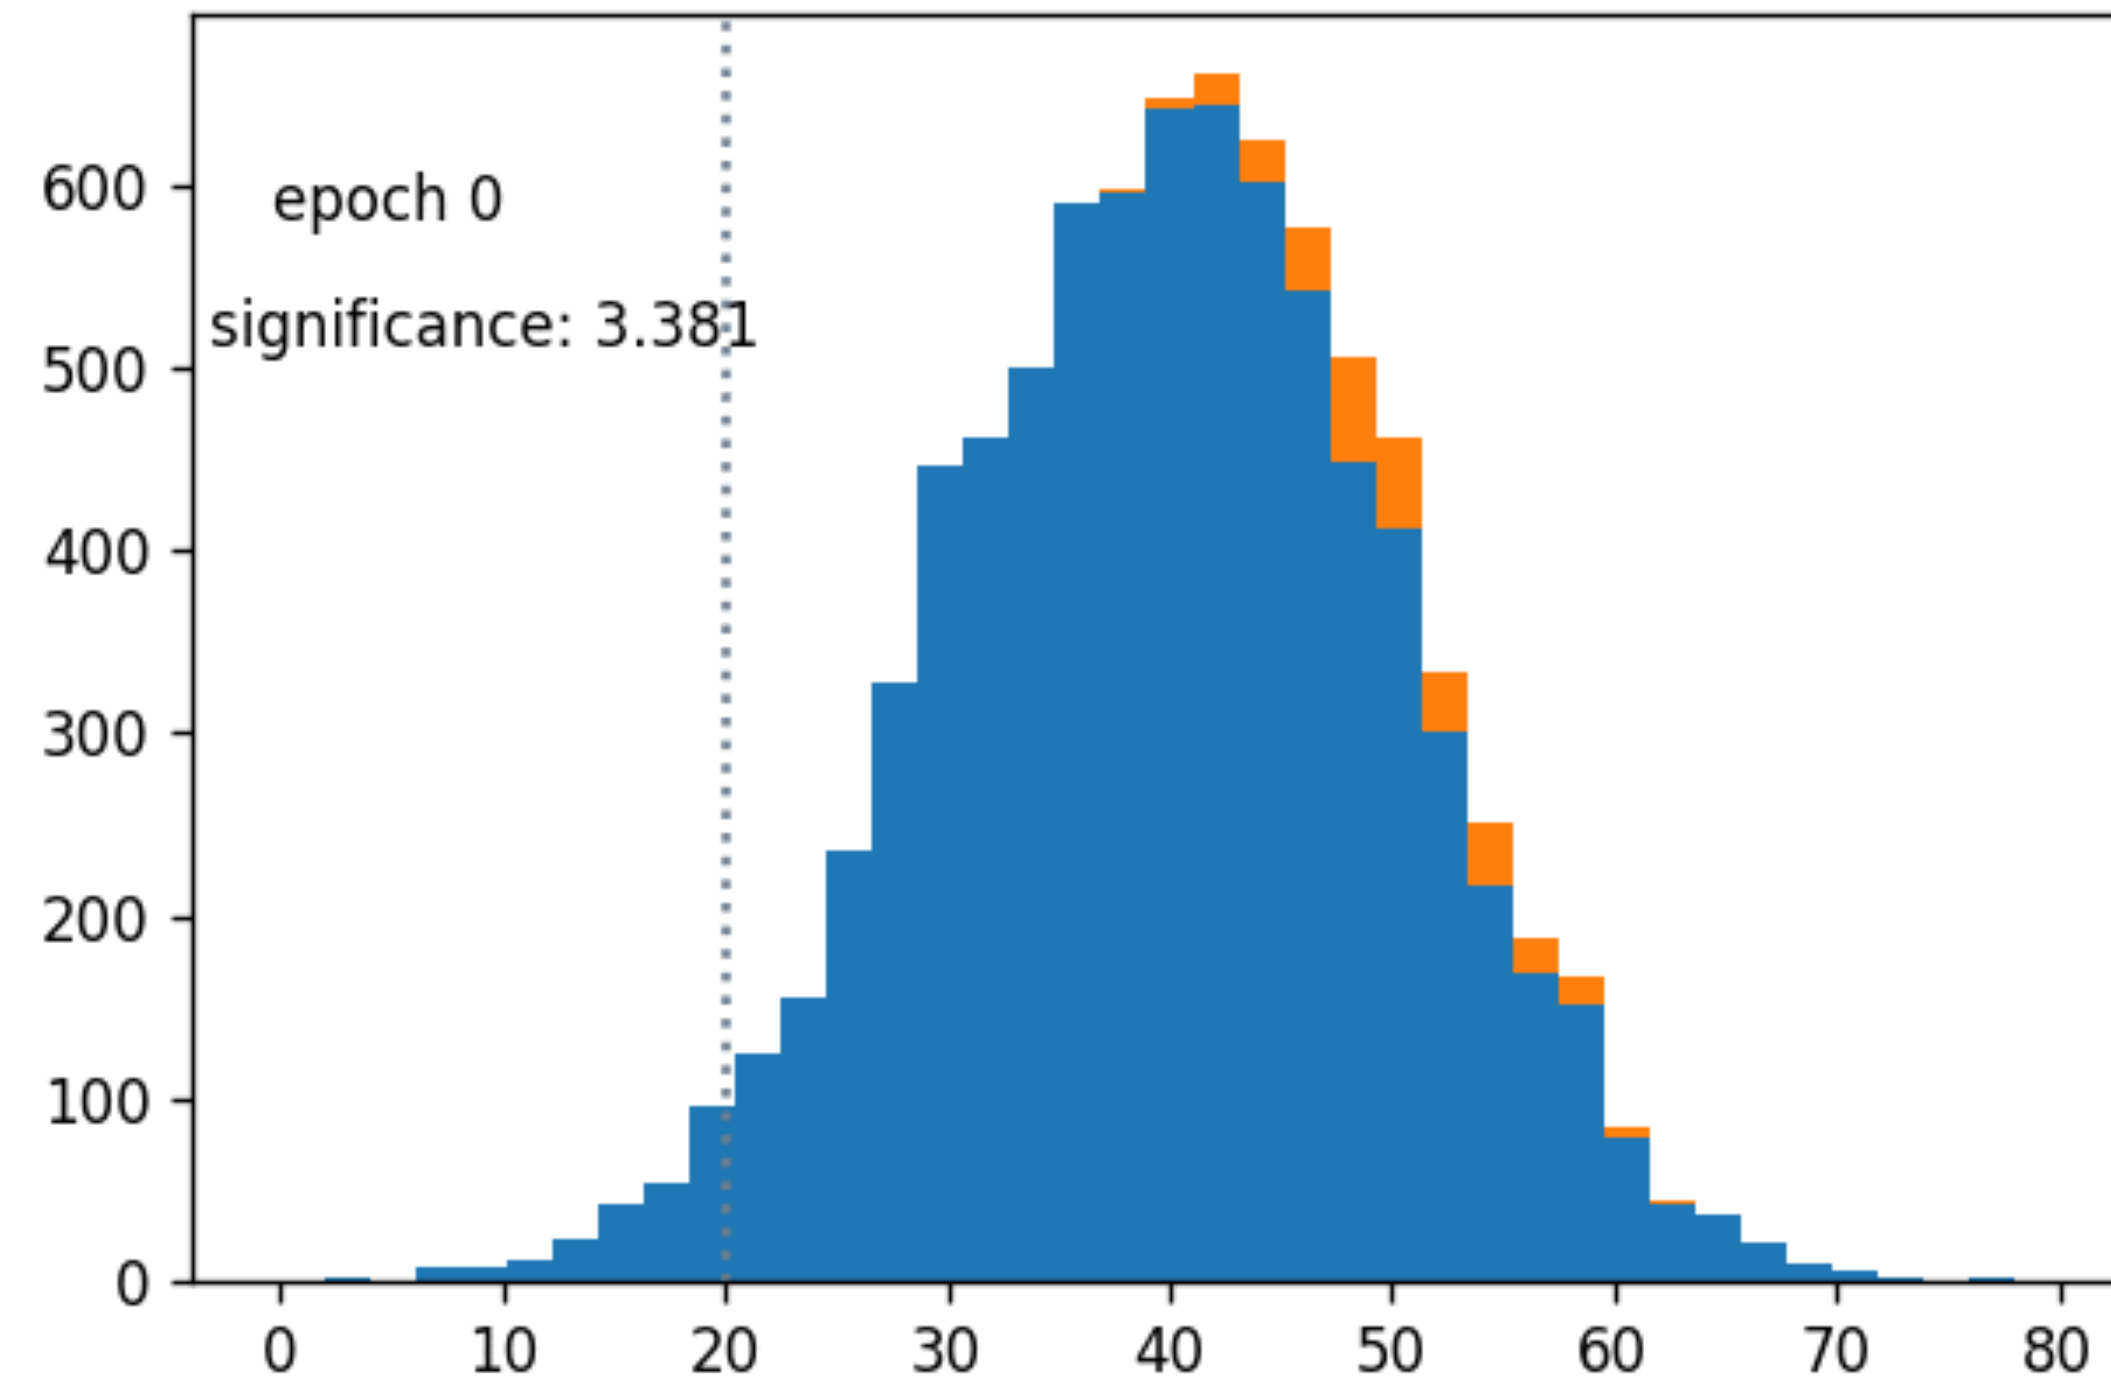

$F(\text{hatched area})$

# *In practice: 1D cut*

Takes steps with

# In practice: *nn*-based observable

Takes steps with

[github.com/pyhf/neos](https://github.com/pyhf/neos)

Decision contours

Expected  $CL_s$

Binned model

# Why should you care?

- Train stuff directly on the physics goals instead of compromising with other loss functions
- 'Systematics-aware' learning
- Automated optimization means more time for physics! (and fika)

<https://www.countryliving.com/uk/wildlife/pets/advice/a2899/buying-puppy-tips/>

also, do it for the puppy.

# *Wanna join for the ride? You can :)*

New effort to make this more general has just started!

All contributions welcome!
