Hunting for the missing walltime: how ARC internals and LRMS interacts with each other

Wednesday, 4 May 2022 15:30 (1 hour)

This session will discuss how information is propagated among various ARC internals (such as AREX, Backend scripts, accounting subsystem) and the local batch system (LRMS). We will use the “missing walltime” puzzle as an example (see bug 4050).

Session Classification: Day 1

Track Classification: ARC7
