## The "old-code" laundry list of Mattias

*Thursday, 5 May 2022 14:10 (1 hour)*

This block is to understand which code parts are "aging bad", i.e. which components, libraries, code parts will soon cause us headaches because of difficult maintenance or because there are targeted for discontinued support in newer distributions.

Mattias Ellert and Anders Waananen will bootstrap the discussion.

**Session Classification:** Day 2b

**Track Classification:** ARC7
