

Slides for Doktoranddagarna

Working title: “Oh my god, thesis writing is stressful, why did nobody warn me, pls send help”

Adrian Nassirpour

4 Years over in a flash...

- For actual slides related to my work...come and see (hopefully) my defense!
 - I will (hopefully) defend my thesis on the 9th of Dec.
 - Come see it!
- A lot of work done has been done:
 - 15 Presentations
 - 4 Proceedings
 - 2+1 Papers

Advice for courses?

- Courses I would recommend:
 - CERN School of Computing (6 ECTS)
 - NBI+Helsinki Detector School? (10 ECTS)
- Important to keep hobbies outside of physics!
 - Otherwise you will go insane.

Advice for future PhDs

- You are employed as a student!
 - You are hired to LEARN, not to PRODUCE!
- Don't overcommit
 - If you do, try to postpone some commitments
 - Try to imagine “stressful times”
- Have fun!
 - You will be better at tasks you find fun
 - Don't assume that your supervisor is always correct
 - Try to engage in discussions in meaningful ways
