What to do if we have too many submissions? We decided to wait and see if it is a problem.

Make an effort and try to keep diversity in the talks.

Possible political/societal talks: "VR", "Big Science Sweden".

Malin: discuss funding, projects are too few with too large budgets, leaving many researchers without support. Lunch discussion or pannel? Depends on how many talks we need to accommodate.

6) Who does what concerning the points above: Carlos finishes the website. We check and spread the information.

7) AOB: None.
