

# Elementary particle physics and astroparticle physics section meeting

25 March 2025, 11:00 am

Present:

Sandhya Choubey, Rebeca González Suárez, Gabrielle Ferreti, Carlos Pérez de los Heros, David Silvermyr, Malin Sjö Dahl, Jörgen Sjölin

Agenda:

- Election of protokollförare: Rebeca Gonzalez Suarez
- Election of justeringsperson: Sandhya Choubey
- Preparation of Partikeldagarna2025
  - Place & dates decided: Nov 24-25, Chalmers
  - Two full days
  - Riccardo Catena and Gabriele Ferreti will organize it.
  - (Gabriele not really available before the 5th of June)
  - Website:
    - Locals will organize it, can follow the structure of other years
    - Registration to open September 1, together with abstract submission
    - Abstract submission to close October 31st
    - Registration to close maybe never but technically November 14th
  - Finances
    - There is some leftover: 14 655,11 SEK that we can use for registration/lunches, Malin proposed to not use it and keep it as backup.
    - Total budget from Uppsala? unclear.
      - Mix of premises, lunches, fika, cost for invited speakers. Dinner was apart.
    - Location will be the same as last time, possibly vouchers for lunch in the cafeteria will be printed.
    - 60-70 people expected to attend.
    - Payment done through the section; no group payments allowed again this time.
  - Local organization issues
    - Coffee for lunch.
  - Poster session
    - Local organizers not inclined to. Everybody will talk.
  - invited speakers
    - 1 particle physics - Gino Isidori (could also visit Chalmers and save us money that way)
    - 1 astroparticle - Julia Tjus?

- Susanne Aalto also in Chalmers, also an option
  - KM3NeT event?
  - We need to pay for them (include their costs in the registration fee)
  - Discussing Pythia could be good
  - VR person to come -> discuss with the section over coffee/lunch having collected discussion points in advance
- AOB
  - For Pythia infrastructure it may be too late in 24-25 November
    - Letter from the section may be in order
  - Maybe if we push together across sections to bring back group grants for infrastructures would be more effective than trying only from particles.
  - Accelerator-day near the particle days -> invite the accelerator people to present their section?
  - ATLAS-day also needs to also be considered
  - Gabriele to prepare a google doc for partikeldagarna organization and share it

Protokollförelse: Rebeca Gonzalez Suarez

Justeringsperson: Sandhya Choubey  
Date of approval: .
